

Joint EHA/ERIC Symposium

B Cell receptors in CLL: a key to understanding the disease, a window to rational therapy

Plus 26th ERIC Meeting Update Session

Chairpersons: E. Kimby and E. Montserrat

Meeting Organizer: K. Stamatopoulos

Date: *Thursday 9th June 2011*

Time: *18.30 - 20.00*

Venue: *ExCel London, South Gallery 7, during the EHA Annual Congress 2011*

Agenda

- Ontogenesis and antigen selection in CLL: deciphering the immunoglobulin gene code – *Freda Stevenson*
- Towards a systems biology approach in CLL: focusing on subsets with stereotyped B cell receptors – *Richard Rosenquist*
- Immunoglobulin genes as a prognostic marker in CLL: mutational status and beyond – *Kostas Stamatopoulos*
- Targeting the BCR as a rational therapeutic option in CLL – *Paolo Ghia*
- Closing remarks and general ERIC update – *Emili Montserrat*
